

Successfully manufactures broadcasting equipment since over 30 years.

P75_02_FM_SD_PCM

High power Liquid Cooled FM transmitter, based on modular design, from 10 kW up to 96 kW output power.

10 kW FM transmitter, model : **P75_02_FM_SD_PCM**

Key Facts:

- Frequency Agile Broadband 88-108MHz
- Modular and compact design: one driver plus two 5 kW amplifier
- **FPGA processor based technology for Crystal Clear Digital Modulation.**
- **Intrinsically redundant for high reliability with Hot Pluggable power supply**
- **Overall efficiency more than 70%**
- **Supports analogue, digital, MPX, AES EBU inputs**
- **Supports IP input**
- **Optional Input from on-board COFDM demodulator**
- **Features Dynamic RDS coding embedded**
- **Very low signal to noise ratio, extremely low distortion**
- **Programmable Derating Power (Plan when decrease your power or turn off your TX, hourly and weekly)**
- User friendly GUI.
- **Remote control via can bus, serial port, SNMP web pages and GSM option included (receive alarm status via email and Text message on your phone)**
